

Murmur: AI-Powered Accessibility for the Visually Impaired

Murmur is an innovative app suite designed to empower visually impaired individuals.

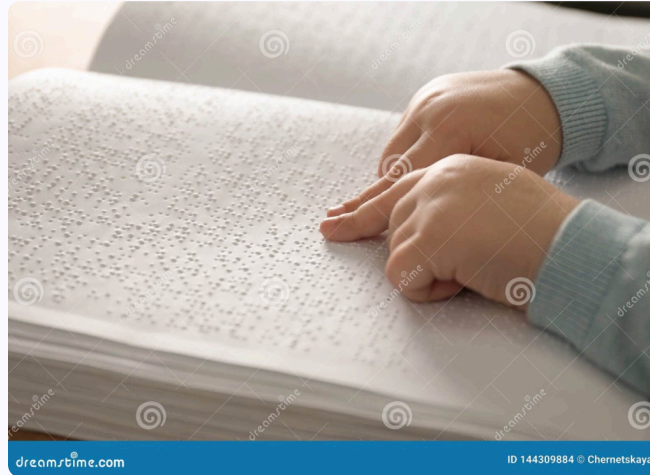

It offers document reading, object and facial recognition, environment description, and navigation tools.

Murmur enhances independence and provides a safer, more informed experience.

Document Reader: Accessing the Written Word

Instant Text Conversion

Converts printed text into audible speech.

Multilingual Support

Supports multiple languages.

Provides immediate access to documents and signs.

Read books, articles, and menus with ease. Murmur's document reader is your gateway to written information.

Object Recognition: Understanding Your Surroundings

Real-Time Identification

Recognizes objects in real-time via the device camera.

Detailed Descriptions

Provides detailed verbal descriptions of identified objects.

Enhanced Awareness

Increases awareness of immediate surroundings.

Identify items around you. From groceries to furniture, Murmur helps you navigate your environment confidently.

Facial Recognition: Connecting with People

Identifies Familiar Faces

Recognizes and announces the names of familiar people.

Enhances Social Interactions

Promotes smoother social interactions and communication.

Remembers Previous Encounters

Stores face profiles for future recognition.

Know who's nearby. Murmur's facial recognition feature helps you stay connected in social situations.

Environment Description: Visualizing Your Space

Detailed Spatial Analysis

Provides comprehensive descriptions of the surrounding environment.

Landmark Identification

Identifies key landmarks and points of interest.

Navigation Assistance

Aids in spatial awareness and navigation.

Gain a clear picture of your surroundings. Murmur translates visual information into accessible descriptions.

Navigator (Path Finder): Guiding Your Way

-  Real-Time Navigation
-  Customizable Routes
-  Obstacle Detection

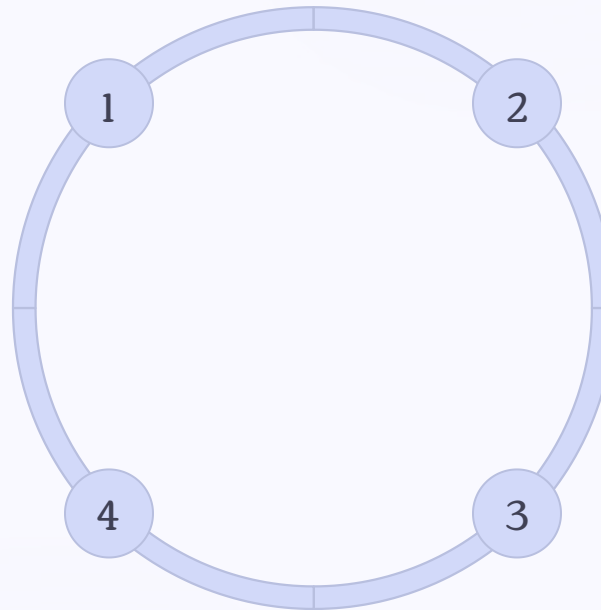

Safely navigate indoor and outdoor spaces. Murmur's Navigator is your trusted guide.

Empowering Independence

Enhanced Accessibility
Provides access to information and environments.

Greater Inclusion
Promotes social engagement and participation.

Increased Confidence
Boosts self-assurance in daily activities.

Improved Safety
Reduces risks associated with visual impairment.

Murmur transforms lives by fostering independence and inclusion.

Key Takeaways & Next Steps

5

Core Features

Document reading, object and facial recognition, environment description, and navigation.

1
